ATTENTION! The license plate mount may scratch or mar the surface it is being attached to. Küryakyn is not liable for damage as a result of the installation of this product.

STEP 3 Start the two included 1/4"-20 x 5/8" Socket Head Cap Screws to secure the clamp halves together as shown in PIC 1.

CAUTION! Be sure there is adequate clearance between the clamp and the pulley.

ATTENTION! Determine a mounting location and orientation of the mount before fully tightening the fasteners. The mount may leave marks when tightened down.

STEP 4 Once the mounting location has been determined for the clamps, evenly tighten the screws that secure the halves together.

STEP 5 Refer to the appropriate Side Mount License Plate Holder instructions to complete the installation.

NOTE: Depending on which side mount plate is selected, the ground clearance may limit installation position/orientation.

STEP 6 Check for clearance between the mount and license plate with moving parts on the motorcycle when the motorcycle's suspension is compressed.

WARNING! THE ADDITION OF A SIDE-MOUNTED LICENSE PLATE MAY AFFECT CORNERING CLEARANCE IN SOME SITUATIONS.

ATTENTION! It is the installer's responsibility to ensure that all of the fasteners (including pre-assembled) are tightened before operation of the motorcycle. Küryakyn will not warranty components lost due to improper installation. Periodic maintenance may be required.

Ride On!
