

INSTALLATION

RADIATOR TOP OR BOTTOM TRIM COVER 3211

FITS: '02-'03 VTX 1800 C, S AND RETRO

PART#	INCLUDED
602311	1 Top or Bottom Trim Cover
903211	1 3211 Hardware Kit Including:
400815	6 4" Wire Ties
400834	4 T-Tap Female Slide Scotch Locks
400846	4 Scotch Locks — Male
401208	2 Alcohol Pads
401209	1 Dielectric Grease Pack
303211	1 Instruction Sheet

PROCEDURE

STEP 1 Test fit trim cover to the desired location (top or bottom). Note the direction the L.E.D. lights are facing.

STEP 2 Use an alcohol pad to thoroughly clean the surface where the adhesive pad will be applied. Make sure the alcohol is completely dry before applying the adhesive.

STEP 3 Remove the adhesive backing and install the trim. Press firmly.

STEP 4 Run wiring out and route to a location where you can connect the wires as follows: **RED TO POWER AND BLACK TO GROUND.**

STEP 5 Connect a spade connector (pink) to each wire from the radiator trim with a wire crimper. Connect a clam shell connector (red) to lead on the bike by folding it together and crimping it with pliers until it snaps together on the end.

STEP 6 Cut the corner off of the dielectric grease pack and apply grease to all wire connections.

STEP 7 Now push the corresponding wire connectors together.

STEP 8 Turn on the key and check for function.

STEP 9 Use wire ties to secure wires where needed.

Ride On!
