STRICTLY OBSERVE THE FOLLOWING GUIDELINES IN ORDER TO USE THE PRODUCT PROPERLY AND AVOID POTENTIALLY DANGEROUS ACCIDENTS.

PROCEDURE

STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface; turn off the ignition and allow the engine to cool.

STEP 2 Test Fit the Accent. Take the new Inner Fairing Accent and place it on the top of the fairing just above the gauges (PIC 1). Move the accent around until you are satisfied with the fit.

STEP 3 Make temporary marks or guide lines using masking tape that you will be able to use for reference when adhering the accent to the dash.

STEP 4 Remove the accent from the dash. With the supplied alcohol pad clean the area in which the new accent will be applied. Wipe dry with a clean rag.

ATTENTION! Ensure the area of installation is free of grease, oil, dirt or other debris to ensure proper adhesion. Kuryakyn WILL NOT issue a warranty on any parts lost due to improper installation.

STEP 5 With the back of your fingernail rub the adhesive backing to activate the adhesive.

ATTENTION! The adhesive will not bond correctly if applied at temperatures less than 50°F. Do not attempt this installation in temperatures less than 50°F.

STEP 6 Remove the tape backing and line up the accent using any marks made in Step 3 (PIC 1). Apply the accent to the dash and press and hold for one full minute. Full bonding will occur in 24 hours.
