STEP 2 Determine the left from the right (sitting on the bike) Flamin' Peg. PIC 1

STEP 3 Starting on the left side, remove the stock peg from the clevis. Pay attention to any spacers or washers installed between the male mount and the clevis, it may be helpful later. Set this hardware aside, it may be reused.

NOTE: Ensure that all of the fasteners are tight before operating the motorcycle. PIC 2

STEP 4 Install the new peg adapter as per the instructions with the peg adapter. Check that the peg adapter is installed correctly and the adapter is able to fold upward.

⚠ WARNING FOOTPEGS MUST BE INSTALLED SO THEY WILL FOLD UPWARD AND REARWARD IF HIT BY ANY OBJECT. FAILURE TO ADJUST THE FOOTPEGS TO OPERATE IN THIS MANNER COULD RESULT IN SERIOUS INJURY OR DEATH.

STEP 5 Place the peg on the peg adapter and loosely install the 5/16"-18 socket head cap screw located on the end of the peg.

STEP 6 Position the peg as desired. Using a hex wrench, tighten the 5/16"-18 socket head cap screw located inside the large hole on the end of the peg. PIC 3 The adapter will seat itself into the peg and keep it from rotating.

⚠ WARNING CHECK TO MAKE SURE THAT THERE IS PROPER GROUND CLEARANCE WHEN CORNERING. LOSS OF CONTROL OF THE MOTORCYCLE AND SERIOUS INJURY MAY OCCUR IF THE FOOTPEG IS NOT POSITIONED PROPERLY. REPOSITION THE FOOTPEG IF NECESSARY SO THAT THERE IS ADEQUATE CORNERING CLEARANCE.

STEP 7 Tighten all hardware securely.

STEP 8 Repeat Steps 3 through 7 for the right side peg.

NOTICE It is the installer's responsibility to ensure that all of the fasteners (including pre-assembled) are tightened before operation of the motorcycle. Küryakyn will not provide warranty coverage on products or components lost due to improper installation or lack of maintenance. Periodic inspection and maintenance are required on all fasteners.
