#### LIMITED WARRANTY

Küryakyn warrants that any Küryakyn products sold hereunder, shall be free of defects in materials and workmanship for a period of one (1) year from the date of purchase by the consumer excepting the following provisions:

- Küryakyn shall have no obligation in the event the customer is unable to provide a receipt showing the date the customer purchased the product(s).
  - •The product must be properly installed, maintained and operated under normal conditions.
  - Küryakyn makes no warranty, expressed or implied, with respect to any gold plated products.
- Küryakyn shall not be liable for any consequential and incidental damages, including labor and paint, resulting from failure of a Küryakyn product, failure to deliver, delay in delivery, delivery in nonconforming condition, or for any breech of contract or duty between Küryakyn and a customer.
- Küryakyn products are often intended for use in specific applications. Küryakyn makes no warranty if a Küryakyn product is used in applications other than intended.
- •Küryakyn electrical products are warranted for one (1) year from the date of purchase by the consumer. L.E.D.'S contained in components of Küryakyn products will be warranted for defects in materials and workmanship for 3 years from the date of purchase where as all other components shall be warranted for one(1) year. This includes, but is not limited to; control modules, wiring, chrome & other components.
- •Küryakyn makes no warranty of any kind in regard to other manufacturer¹s products distributed by Küryakyn. Küryakyn will pass on all warranties made by the manufacturer and where possible, will expedite the claim on behalf of the customer, but ultimately, responsibility for disposition of the warranty claim lies with the manufacturer.

REMOVE THESE HEX FASTENERS AND TRIM PINS

ON EACH SIDE

### STEP 1

Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface and turn off the ignition. Put the bike on its center stand (if equipped) or secure it in a motorcycle wheel chock. **Remove the main fuse**.

## **BIKE PREP:**

Avoid damage to the motorcycle. Protect painted surfaces with a soft cloth or service cover.

### <u>'01-'05 MODELS:</u>

STEP 2 Remove the speaker covers. They are held in place by four plas-

tic spring tabs; remove the covers by gently pulling up and outward on the bottom edge of the speaker cover. Remove the hex screws and trim pins shown in **PIC 1**. Set the covers and hard-

ware aside for now.

**STEP 3** Gently lift up on the meter panel starting at the bottom. There

are posts that fit into rubber grommets holding it in place. Unplug the wire harness and set the meter panel on a soft sturdy

surface.

STEP 4 Refer to PIC 5. Remove the two fasteners securing

the handlebar center cover; remove the cover. Set

the cover and screws aside for now.

Move on to STEP 10.

## '06-UP MODELS:

**STEP 5** Refer to **PIC 2**. Remove the ignition switch cover.

**STEP 6** Refer to **PIC 3**. Disconnect the meter panel by gently pulling upward at

the bottom to release the pins; gently pull the top towards you to re-

lease the tabs.

**STEP 7** Refer to **PIC 4.** Disconnect the connector behind the panel at the bot-

tom. Refer to **PIC 5**. At the top of the panel, pull the rubber boot away

from each tweeter speaker and disconnect the connector. Set

the dash on a soft, sturdy surface.

**STEP 8** Remove the four display assembly screws and two washers from

the locations shown in **PIC 6**; set them aside for now.

**STEP 9** Refer to **PIC 7**. Lift up on the display assembly and remove the

two screws securing the handlebar center cover; set the cover

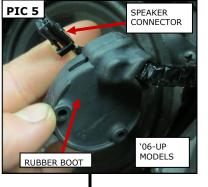

aside for now.

HANDLEBAR RISERS/SETBACKS—GL1800

INSTALLATION

**STEP 10** 

Remove the two OEM bolts securing the clutch-side handlebar; gently rest the handlebar on the blanket or service cover for now.

Küryakyn

NOTE:

Refer to PICs 8, 9, and 10 to determine the orientation of the block or shim for your desired handlebar position. Set the desired components and included M10 bolts (or OEM bolts) and washers within arms reach of the work area.

THE BLOCKS AND SHIMS ARE DESIGNED TO BE INSTALLED SEPA-RATELY. **DO NOT COMBINE THEM IN ANY WAY.** IMPROPER INSTALLATION CAN CAUSE FASTENER FAILURE RESULTING IN LOSS OF CONTROL WHICH CAN CAUSE DEATH OR SERIOUS INJURY.

## **INSTALL THE BLOCKS:**

STEP 11 Refer to PIC 11 on PAGE 4. Loosen the clutch and brake line keepers at the base of the handlebars until the lines can move freely.

Refer to PIC 8. Attach the block (with the angle facing outward toward the rear) to the fork-top-bridge with the two OEM bolts from STEP 10. Torque the bolts to 20 ft lbs

(26 Nm).

NOTICE

Avoid damage to the motorcycle. Protect painted surfaces with a soft cloth or service cover.

NOTE: Refer to PIC 12 on PAGE 4. Ensure that the cables and wires remain in their

the cables and wires remain in their keepers on the under side of the bars before installing.

STEP 13 Position the handlebar over the block, align the holes and secure it with the included M10 holts and washers.

STEP 14 Repeat STEPS 10 through 13 for the other side.

STEP 15 Torque the four M10 bolts to 20 ft-lbs (26 Nm).

STEP 16 Tighten the clutch and brake line keepers. (The rubber locating bosses will not line up with the keepers).

STEP 17 Cover the exposed bolt holes with the included two Black Plugs. Move on to STEP 23.

## or

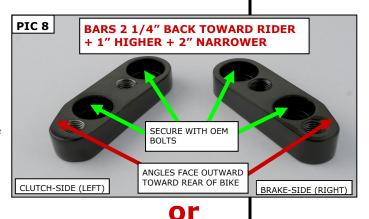

## **INSTALL THE SHIMS:**

STEP 18 Refer to PICs 9 or 10. Position the shim in the desired direction over the fork-top-bridge.

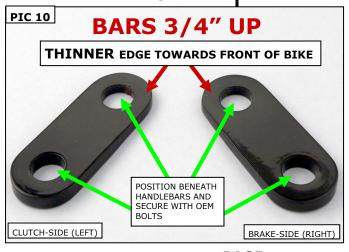

NOTE: Refer to PIC 12 on PAGE 4. Ensure that

the cables and wires remain in their keepers on the under side of the bars be-

fore installing.

HANDLEBAR RISERS/SETBACKS—GL1800

**INSTALLATION** 

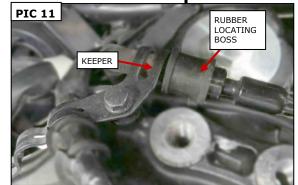

STEP 19 Position the handlebar over the shim, align the holes, and secure it with the OEM

STEP 20 Repeat STEPS 10, 18 and 19 for the other side.

STEP 21 Torque the OEM bolts to 20 ft-lbs (26 Nm).

STEP 22 Reinstall the handlebar center cover (shim application

only).

## **REASSEMBLY:**

STEP 23 Remove the motorcycle from the center stand or wheel chock. Turn the handlebars all the way left and right to their full stop positions to ensure there is no binding or interference. Make any necessary adjustments before finishing the installation or operating the motorcycle.

STEP 24 Reinstall the display assembly ('06-Up Models only), meter panel, and any covers in the reverse order they were removed.

**STEP 25** Reinstall the main fuse.

Küryakyn

## **NOTICE**

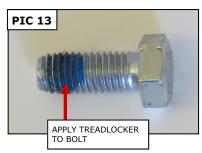

It is the end user's responsibility to ensure that all of the fasteners (including pre-assembled) are tightened before operation of the motorcycle. Küryakyn will not provide warranty coverage on products or components lost due to improper installation or lack of maintenance. Periodic inspection and maintenance are required on all fasteners.

THE M10 X 1.25 X 25MM BOLTS MUST HAVE THREADLOCK COMPOUND RE-APPLIED AND MUST BE TORQUED IF REMOVED AFTER INITIAL INSTALLATION. FAILURE TO DO SO MAY RESULT IN UNINTENDED LOOSENING WHICH COULD RESULT IN LOSS OF CONTROL CAUSING SERIOUS INJURY OR DEATH.

THE FEMALE THREADS IN THE RISER/SETBACK BLOCKS AND THE THREADS ON THE M10 X 1.25 X 25MM BOLTS WILL NEED TO BE CLEANED TO REMOVE ANY THREAD-LOCKER RESIDUE BEFORE RE-INSERTING.

RE-APPLY LOCTITE® THREADLOCKER BLUE 242® OR EQUIVALENT, AS SHOWN IN **PIC 13, TORQUE TO 20 FT-LBS (26 NM)** USING A TORQUE WRENCH. LET CURE PER THE THREADLOCK MANUFACTURERS INSTRUCTIONS AFTER INSTALLATION.

Ride On!
