### THANK YOU FOR CHOOSING KÜRYAKYN!

### PROCEDURE

**STEP 1** Thoroughly clean the round surfaces on your clutch cover, timing cover, and left crankcase cover using rubbing alcohol or similar solvent. Make sure the surface is clean and free of any residue.

**STEP 2** The smallest insert (3.45") is for the timing cover, the medium sized insert (4.2") is for the left crankcase cover, and the largest (6.47") insert is for the clutch cover. Peel the backing from the adhesive on one of the inserts. Carefully align the edges of the insert with the edges of the engine cover while making sure the insert's grooves are horizontal. Press the insert firmly in place and hold for one minute to ensure a good bond. Repeat procedure for the remaining two covers.

### NOTE

When installing the 6.47" diameter insert, the "flat" edge should be at the bottom of the clutch cover.
