PROCEDURE

STEP 1 Read and understand all steps in the instructions before starting the installation. Park the motorcycle on a hard, level surface; turn off the ignition and allow the engine to cool.

WARNING! YOU WILL BE WORKING AROUND THE ENGINE AND EXHAUST SYSTEM DURING INSTALLATION. ENSURE THAT THE ENGINE AND EXHAUST SYSTEM HAVE FULLY COOLED TO PREVENT INJURY.

STEP 2 Remove the two screws that secure the regulator as shown in PIC. 1.

STEP 3 Once the screws have been removed, start a screw from the hardware kit in each of the holes to ensure that the holes are clear of excess thread locker and then remove them.

NOTE: Verify that the screws will go in freely or they may cross-thread when installing the cover.

STEP 4 Place the cover over the regulator; insert the screws and washers from the hardware kit through the cover and regulator, securing them to the motorcycle being careful not to over tighten them.

ATTENTION! It is the installer's responsibility to ensure that all of the fasteners (including pre-assembled) are tightened before operation of the motorcycle. Kuryakyn will not warranty components lost due to improper installation. Periodic maintenance may be required.
