308261	1 Installation Instructions

THANK YOU FOR CHOOSING KURYAKYN!

NOTE Depending on the model you are installing this part on you may or may not use the spacer washer provided.

PROCEDURE

STEP 1 Remove the top shock fastener shown in PIC.1. This fastener and washer will be reused.

STEP 2 PIC.2 shows the tape already installed inside the cover. The purpose of the tape is to protect the surface of the shock and eliminate any vibration.

STEP 3 Pre fit the cover to see if the spacer washer is needed under the cover to keep it parallel to the shock. You can also put the OEM washer along with the spacer under the cover if needed.

STEP 4 For ease of installation place OEM fastener thru cover then add spacer to fastener under cover if needed. Position covers in place and secure. See PIC.3.

STEP 5 Check your particular bikes service manual for the proper torque value for this fastener.
