### THANK YOU FOR CHOOSING KÜRYAKYN!

### PROCEDURE

**STEP 1** Use the supplied alcohol pad to clean the rim around the stock pulley cover. Be sure to remove any grease or debris that may prevent the adhesive from bonding. Attention! Before installation, be sure to clean the rim of the stock cover to ensure proper adhesion. Kuryakyn WILL NOT warranty any parts lost due to improper installation.

**STEP 2** The Kuryakyn drive pulley cover can be oriented in any direction you desire. We suggest leaving enough of a gap between the chrome cover and the bracket to avoid marring the chrome surface in the event the bracket must be removed. See PIC.1.

**STEP 3** Rub the paper backing on the self-adhesive strips to activate the adhesive. Remove the paper backing from the adhesive strips and center the chrome cover over the rim of the stock drive pulley cover. Press firmly and hold for 1 minute to ensure proper adhesion. Full bond strength will occur within 24 hours.
